- **Choosing Plant Material**
- Light, Soil Moisture, Soil fertility, Exposure, Micro Climates, Color, Availability
- Embrace the Area You Have
- Choose plants that will thrive
- Cover the soil with plants / Plant densely
- Plant densely
- Plant for all seasons
- Make a list of the plants you "have to have"
- Make a chart or graph of when these plants flower.
- Choose plants to fill in so you always have plants in bloom
- Chose ground cover plants so you can cut down on weeding and cool and hold your soil.
- Prepare the ground (this is not what you think)
- Purchase and plant
- Water and enjoy!
